

BONFIRE
TERMINAL

ISAAC NEWTON

"If I have seen further, it is by standing on the shoulders of giants."

Every AI breakthrough stands on centuries of scientific progress. The lineage from Newton's calculus to modern neural networks is unbroken.

JEFF BEZOS

"We are at the beginning of a golden age of AI. Recent advancements have already led to invention that previously lived in the realm of science fiction."

Founder of Amazon. Early investor in artificial intelligence at scale.

ELON MUSK

"The pace of progress in artificial intelligence is incredibly fast. It is growing at a pace close to exponential. The risk of something seriously dangerous happening is in the five-year timeframe."

CEO of Tesla, SpaceX, and xAI. Building Grok and investing billions in AI compute.

MEET JOHN CRESTANI

Author of *Work At Home Secrets* (20,000+ copies sold via TV infomercials). John went from asking his boss for a raise to earning \$500K/month selling online. His students have gone on to build six, seven, eight, and even nine-figure businesses.

"Those that control AI will control the world. Those that don't will be the ones controlled. In my community we work together for a positive future with freedom, family, and fortune."

In the AI age, there is immense opportunity to grow and prosper. Bonfire Terminal puts the same decisive advantage that Fortune 500 companies have on YOUR desktop.

AN INTRODUCTION TO ARTIFICIAL INTELLIGENCE

Since the dawn of civilization, humans have sought to extend their cognitive abilities through tools. From the abacus to the printing press, each leap amplified what one person can accomplish. The first calculating machines appeared in the seventeenth century, and by the early twentieth century, mechanical computers were solving equations that would take humans years to complete by hand.

The computer revolution that began with ENIAC in 1946 gave us the power to process millions of calculations per second. But it still required humans to write every instruction, debug every error, and maintain every system. The gap between human intent and machine execution remained vast.

Artificial Intelligence changes this equation entirely. For the first time in history, software can understand natural language, generate original content, reason about complex problems, and make decisions — all without explicit programming. The implications for productivity, creativity, and wealth creation are staggering.

The modern AI era began in 2017 with the Transformer architecture, published in Google's landmark paper 'Attention Is All You Need.' This single breakthrough enabled ChatGPT, Claude, Gemini, and every major language model in existence today. Within five years, AI went from a research curiosity to the fastest-growing technology category in the world.

But the companies building these models are not building them for you. They are building platforms designed to extract maximum recurring revenue from your dependence. Every month, they raise prices, change terms, and restrict access to features you rely on.

At Bletchley Park in 1943, Alan Turing and the Colossus machine proved that organized intelligence processed faster than an enemy could respond. Today, Bonfire Terminal puts that same decisive advantage on YOUR desktop — with no recurring fees, no data harvesting, and no dependency on any single provider.

THE COST OF WAITING

Why AI is the greatest wealth-creation opportunity since the internet.

TRADITIONAL

1 person

40 hours / week

1 client at a time

Limited by hours

\$60,000 / year

A.I. GHOST AGENCY

1 person

10 hours / week

50 clients simultaneously

Limited only by imagination

\$300,000+ / year

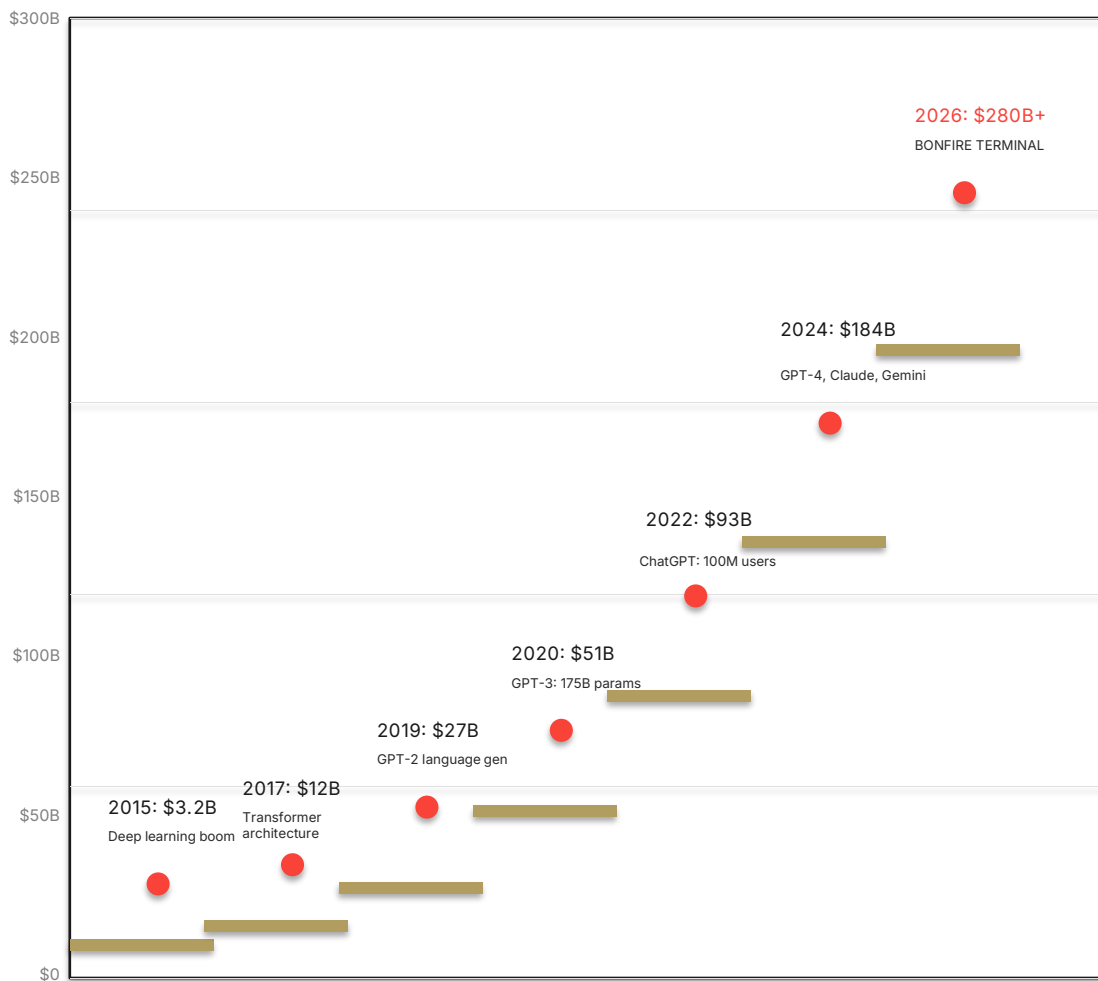

"AI doesn't replace you. It multiplies you."

AI MARKET GROWTH TRAJECTORY

Global AI Market Size (Billions USD)

Sources: McKinsey, Gartner, Statista

The global AI market has grown from \$3.2 billion in 2015 to an estimated \$280 billion in 2026. Companies and individuals who own their AI infrastructure today will capture a disproportionate share of this value. Bonfire Terminal positions you on the right side of this curve.

WHY OWN YOUR AI?

HARDER

OpenClaw and cloud chatbots are sandboxed — they can't touch your files, run your software, or control your hardware. OpenClaw requires you to self-host a Node.js server and burns \$400–500/month in hidden API costs. Bonfire's compiled daemon runs invisibly on your machine — bridges (Telegram, Slack, Discord) and AI providers (Claude, Gemini, Grok) are built directly in. Zero server setup. It has full access to your GPU, disk, and installed applications — for a one-time cost.

BETTER

OpenClaw only processes what you route through its plugin system. Cloud chatbots only know what you paste into a chat window. Bonfire's local AI reads your files, understands your project context, and references your history across sessions. It accesses local documents, spreadsheets, images, and code — producing better output because it has better input. No copy-pasting, no re-explaining, no lost context.

FASTER

Every OpenClaw task triggers 3–8 API calls at 500ms+ each, adding 5–15 seconds of latency per action. Cloud AI means uploading, waiting, downloading. Bonfire processes locally at native speed — 50–200ms first-token response. Whisper transcribes your voice instantly. Just speak, and your content renders in seconds. No bandwidth limits, no rate limits, no file-size restrictions.

STRONGER

OpenClaw's skill marketplace had a 12% malware infection rate — 341 malicious skills including keyloggers and data stealers. 63% of exposed OpenClaw instances were vulnerable to remote code execution. Cloud AI platforms score as low as Grade D on privacy audits and train on your data by default. Bonfire runs 100% locally — your data physically cannot leave your machine. Private by architecture, not by promise.

WHAT BONFIRE CONNECTS

The AI landscape divides into connectivity tools that move data between services, and content tools that create original output. Most platforms do one or the other. Bonfire Terminal does both — locally on your machine with a perpetual license.

CONNECTIVITY TOOLS

Connectivity platforms like Zapier, Make, and n8n automate workflows between services. They move data, trigger actions, and synchronize information. Essential infrastructure, but they don't create anything — they are pipes, not producers.

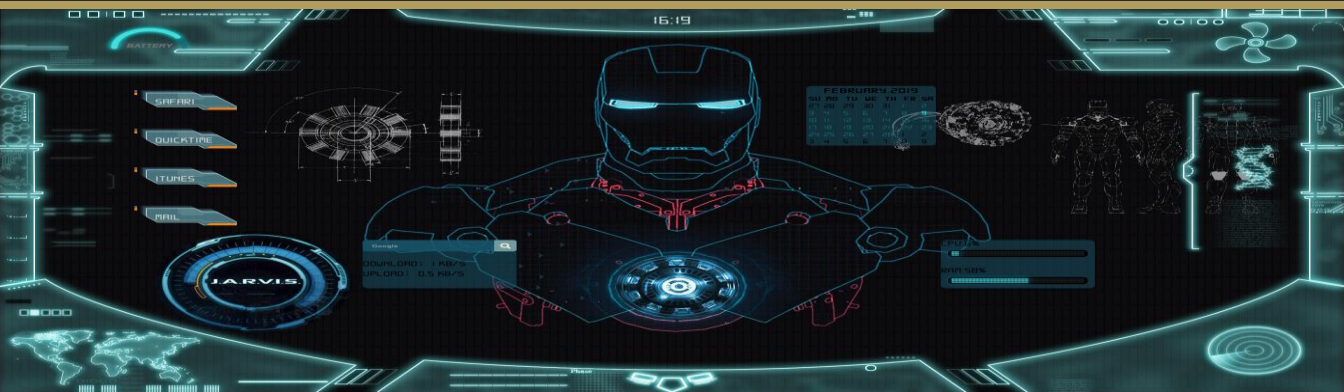

CONTENT TOOLS

Content tools like Claude, Gemini, and Whisper create original output from prompts: text, images, video, audio, and code. But cloud versions charge monthly, your data lives on their servers, and they can change pricing or terms at any time.

Bonfire Terminal sits at the intersection of both categories:

It **CONNECTS** to any AI provider — OpenAI, Claude, Gemini, Grok, or local models.
It **CREATES** content across every medium — video, transcription, images, text, code.
It runs **LOCALLY** with zero recurring fees and full data privacy.

YOUR BONFIRE LEARNING PATH

A proven 5-level system from setup to scaling

1

SETUP

AI tools, affiliate networks, website, ad platforms

Configure Bonfire, connect providers, launch AlphaChat

2

SIGNS OF LIFE

Optimize targeting, creative, landing pages, offers

Use AI to test and refine — find what converts

3

GROWING

Launch campaigns, expand audiences, add creatives

Scale what works across channels with AI automation

4

SCALING

Split-test, increase budgets, optimize payouts

Multiply revenue with data-driven AI decisions

5

MAINTENANCE

Automate, build a team, compound profits

Your AI ghost agency runs while you focus on strategy

CLOUD AI vs. OWNED AI

The cloud AI model extracts recurring revenue. You pay monthly, own nothing. Here is how Bonfire Terminal compares:

FEATURE	CLOUD AI	BONFIRE TERMINAL
Cost	\$20-200/mo per tool per user, forever	One-time \$5,000 Own forever
Data Privacy	Your data on their servers Used for model training	100% local processing Data never leaves
Availability	Internet required Outages affect work	Works fully offline No dependencies
Customization	Limited to their UI No local integration	Full CLI + AlphaChat Plugin ecosystem
Ownership	You rent monthly They own everything	You OWN the software Perpetual license

CLOUD AI SUBSCRIPTION COST OVER TIME

	Year 1	Year 2	Year 3	Year 5	Year 10
Cloud AI	\$2,400	\$4,800	\$7,200	\$12,000	\$24,000
Bonfire	\$5,000	\$5,000	\$5,000	\$5,000	\$5,000
SAVINGS	-\$2,600	-\$200	+\$2,200	+\$7,000	+\$19,000

RESULTS & INCOME POTENTIAL

WHAT OUR STUDENTS SAY

"We made 150 sales and our first \$1,114.20 in our first month."

— Current Student, AI Marketing Mentorship

"I got my 6th commission. All these results are 100% from implementing what was taught. Super excited... now just working to get bigger numbers."

— Current Student, AIMS Graduate

"I wanted good information by people who knew what they were talking about and are good at what they do."

— Amy, Telehealth Niche

AIIDE INCOME POTENTIAL

90%

WHO IS BONFIRE FOR?

CONTENT CREATORS

YouTubers, podcasters, and social media managers producing content at scale. AI-powered video editing, transcription, and scriptwriting.

AFFILIATE MARKETERS

Run ads, build funnels, manage campaigns across 16 affiliate platforms. Automate content creation for every channel.

SMALL BUSINESS OWNERS

Professional marketing output without a marketing department. Generate ad copy, email sequences, social posts, and video.

IT CONSULTANTS & AGENCIES

Deploy Bonfire for clients as a Certified AIDE. Keep 90% of every sale — only 10% licensing fee to us.

FREELANCERS

10x your content output while maintaining full creative control. Serve more clients in less time with AI tools at native speed.

ENTREPRENEURS

AI infrastructure you own outright. Scale without escalating cloud costs. Build on a foundation you control.

"The best time to own your AI was yesterday. The second best time is today."

WHAT'S UNDER THE HOOD

50+ tools and platforms across four categories. All local, no cloud middleware.

AI PROVIDERS

Claude, Gemini, Grok, OpenAI + offline Llama models.

VIDEO & AUDIO

FFmpeg, Whisper, ElevenLabs, Blender, Remotion, Kdenlive.

DESIGN & CONTENT

Image generation, design, video editing, post-production.

MARKETING

Publish to every platform. Manage ads and e-commerce.

Requirements: Windows 10+ / macOS 12+ | 8 GB RAM | 10 GB disk

CHOOSE YOUR EDITION

BONFIRE TERMINAL

The Complete AI Ownership Platform

\$5,000

- ✓ Perpetual license — buy once, own forever
- ✓ 1 onboarding session + 1 AI coaching session
- ✓ Two live weekly webinars from John for support (*Mondays 3pm US PT, Thursdays 1pm US PT*)
- ✓ AI Marketers Lifetime Club Membership, stay ahead of the curve digitally
- ✓ 12-module AI Marketing video course by John
- ✓ 5 AI providers: Claude, Codex, Gemini, Grok + offline capability with TinyLlama
- ✓ 20% affiliate commission on all referrals

+ COACHING

\$10,000

- ✓ Everything in Bonfire Terminal
- ✓ 8 private 1-on-1 coaching sessions
- ✓ Affiliate campaign hands-on setup via Zoom
- ✓ Preferred help from John on live weekly webinars

+ AIDE CERTIFICATION

\$18,000

- ✓ Everything in Coaching (8 sessions)
- ✓ 10 AIDE certification trainings
- ✓ Reseller rights (keep 90% of sales)
- ✓ 80% recurring on support renewals
- ✓ Sales materials + dedicated support

PLATINUM

WHAT INDUSTRY LEADERS SAY ABOUT AI

"The most important development in the history of technology. AI will be more profound than electricity or fire."

— Elon Musk, CEO of Tesla, SpaceX, and xAI

"AI is the most powerful technology force of our time. Every industry will be revolutionized by artificial intelligence."

— Jensen Huang, CEO of NVIDIA

"The world's first trillionaires are going to come from somebody who masters AI and all its derivatives."

— Mark Cuban, Investor, Entrepreneur, Shark Tank

5 AI Providers | 50+ Integrations | Perpetual License
Zero Recurring Fees | 100% Offline Capable | Own Your Data

FREQUENTLY ASKED QUESTIONS

Do I actually own the software?

Yes. Perpetual license. No subscriptions, no recurring fees. Buy once, own forever.

Does it work without internet?

Yes. All media processing and local AI models work fully offline.

How is Bonfire different from OpenClaw?

Bonfire processes locally, works offline, and is built for marketers — not developers.

Can I use this for my clients?

Yes. AIDE certification gives you reseller rights — keep 90%, pay only 10% licensing fee.

Can I reschedule coaching calls?

Yes, on a discretionary basis. We respect your time and ask that you respect your coach's time in return. Rescheduling is available with reasonable notice.

What support do I get?

Community access, weekly webinars, email support. Coaching adds priority.

A NOTE FROM JOHN CRESTANI

I built Bonfire Terminal because I believe everyone deserves to own their AI tools, not rent them.

My commitment is simple: help you build real, lasting wealth online using the most powerful technology ever created.

Every feature, every integration, every update is designed with one goal — your success.
